

ELCAN SpecterM145 Optical Sight

The ELCAN SpecterM145 Optical Sight combines ELCAN's legendary robustness and optical brilliance with a ballistically calibrated LED-illuminated ranging reticle. Designed for application to Machine Guns, M4 Carbines, M16/AR15 and AR10 rifles, it is in wide service with the United States Army (NSN 1240-01-411-6350) and has been proven to

withstand the rigors of modern combat.

The sight may be mounted to any MIL-STD-1913 receiver or base seconds and will retain zero when removed and re-attached to the weapon. Optional versions include mounts incorporating ballistic compensation in addition to that provided by the reticle.

The M145 series is built to stringent specifications and is designed for extreme-duty applications where only the most rugged equipment will suffice.

Optional accessories: Laser protection (military orders only), sun shade, ARD, OTIS lens swabs, lens cleaning kit, optics cleaning system

Specifications
