

Night Vision Binocular AC-2249

The AC-2249 is a long-range night vision binocular, based on “single tube/dual eye” design. The binocular was designed and built to the highest quality standard fit for law enforcement & heavy commercial use. Hand-selected generation 2 image intensifier tubes guaranty flawless performance even in the darkest conditions. The AC-2249 is all around the world for law enforcement, surveillance and search and rescuer operations. With its 5x magnification it is an ideal tool for Border Patrol, Coast Guard, or any other application where a high magnification night vision device is required. If needed, the binocular can be equipped with a removable long-range infrared illuminator. Its design and rugged construction make it safe to use in marine environments, as it is tightly sealed from dust, sand, and water. Covered by one-year manufacturer warranty.
