

Night Vision Monocular Wake 2

The Wake 2 is a lightweight night vision monocular built around a high performance Gen 1 night vision image intensifier. Developed as an economical alternative to more expensive Gen 2+ & 3 devices, it is designed to perform the same tasks. The monocular features a powerful IR illuminator that enhances performance in low ambient light conditions at ranges up to 50 meters. The ergonomically designed, durable, satin textured body is very comfortable and makes the user's experience much more enjoyable. The Wake2 is equipped by an

automatic shutoff after 2 seconds, when exposed to a bright light source. This protects the image intensifier tube from damage and is a feature unique in its class. The monocular is 20% more energy efficient than its competitors resulting in a 60 hour battery life. A built-in ¼" tripod socket makes extended observation more comfortable. The device is covered by a two years warranty.

Features: Lightweight; built-in IR illuminator; fully multicoated optics; built-in ¼" tripod socket; automatic bright light shut off;

Standard accessories: Soft carrying case; lens cup; lens tissue

Optional accessory: Hard waterproof carrying/storage case

Specifications

Magnification	2.6x
Field of View	20 deg
Objective Lens	44 mm
Lens system	59 mmF/1.2
Eye relief	12 mm
Water resistance	IPX4
Focus Range	1 m to infinity
Diopter Adjustment	-4...+4
Operational temperature	-30 to +45 °C
Battery	CR123 or two AA
Battery Life	60 hours
Dimensions	180x80x50 mm
Weight	340 g
